DETAILED ACTION

Claims 1-20 are currently pending.

Election of Species Requirement

This application contains claims directed to the following patentably distinct species of the claimed invention.

(A) selection of "one or more locations", as in 1) claim 3, or 2) claim 4;

(B) steps of "generating a surgical plans, as in 1) claim 14, or 2) claim 17.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from group (A) AND group (B) above for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

The species within each group are distinct from each other because they comprise different method steps.

Because these species are distinct for the reasons given above, and because a search of one does not necessarily overlap with that of another species, it would be unduly burdensome for the examiner to search and examine all of the subject matter being sought in the presently pending claims, and thus, species election for examination purposes as indicated is proper.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141 . If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Borin whose telephone number is (571) 272-0713. The examiner can normally be reached on 9am-5pm.
